Attorney's Docket: 2002DE106

Serial No.: 10/510,086

Art Unit 1793

Response to Office Action of December 19, 2008

This listing of claims will replace all prior versions, and listings of claims in the application:

1) (Currently Amended) A method for coloring a fertilizer comprising the steps of producing a pigment oil preparation consisting of

5 to 60% by weight of at least one organic pigment selected from the group consisting of monoazo pigments, diazo pigments, diazo condensation pigments, laked azo pigments, triphenylmethane pigments, thio indigo pigments, thiazine-indigo pigments, perylene pigments, perinone pigments, anthanthrone pigments, diketopyrrolopyrrole pigments, dioxazine pigments, quinacridone pigments, phthalocyanine pigments, isoindolinone pigments, isoindoline pigments, benzimidazolone pigments, naphthol pigments, quinophthalone pigments, furnace blacks and gas blacks,

40 to 95% by weight of a paraffin oil or vegetable oil or a mixture thereof,

0 to 10% by weight of a dispersant or dispersant mixture and

0 to 5% by weight of at least one conventional additive selected from the group consisting of a suspension agent, anticaking agent, wetting agent, preservative, viscosity stabilizer and additive for influencing the rheology,

in each case based on the total weight of the pigment preparation, and spraying the pigment oil preparation onto the surface of ~~applying the pigment preparation to the~~ fertilizer to be colored.

Attorney's Docket: 2002DE106Serial No.: 10/510,086Art Unit 1793Response to Office Action of December 19, 2008

- 2) (Previously Presented) The method as claimed in claim 1, wherein the pigment oil preparation consists of 5 to 40% by weight of at least one organic pigment and 60 to 95% by weight of a paraffin oil or vegetable oil or a mixture thereof.
- 3) (Canceled)
- 4) (Canceled)
- 5) (Canceled)
- 6) (Previously Presented) The method as claimed in claim 1, wherein the fertilizer is a synthetic inorganic fertilizer selected from the group consisting of nitrogen, phosphate, potassium, calcium and magnesium fertilizers.
- 7) (Canceled)
- 8) (Previously Presented) The method as claimed in at claim 1, wherein the organic pigment is in the form of a powder or granular material, and the producing step further comprises dispersing the organic pigment in the presence of the paraffin oil and/or vegetable oil and optionally of the dispersant or dispersant mixture and/or of the at least one conventional additive.

Attorney's Docket: 2002DE106

Serial No.: 10/510.086

Art Unit 1793

Response to Office Action of December 19, 2008

9) (Currently Amended) The method as claimed claim 1, wherein ~~the applying~~
~~step further comprises applying the fertilizer~~ in an amount of 0.00001 to [[0.10%]]
0.015% by weight of the pigment oil preparation, based on the weight of the fertilizer
to be colored is sprayed onto the surface of said fertilizer.

10) (Canceled)

11) (Previously Presented) The method as claimed in claim 1, further comprising
the step of diluting the pigment oil preparation with paraffin oil or vegetable oil or
mixture thereof before applying the pigment preparation to the fertilizer.

12) (Previously Presented) A colored fertilizer made in accordance with the
method of claim 1.

13) (Previously Presented) A colored fertilizer made in accordance with the
method of claim 11.
